WORK EXPERIENCE

Co-Founder   March 2022 - Present

Valltech, LLC

Portland, OR

Designed and built a B2B application that handles long term manufacturing contracts and their relationship between the sellers, buyers, and brokers.
- Wrote clear user stories and product specifications for 4 modules.
- Met with stakeholders to refine and demo feature sets.
- Developed the presentation, application, domain, and data layers (in Flutter) to handle 100% of CRUD operations for contracts.

Engineered a no-code application that allows users to create and deploy smart contracts on the blockchain network.
- Produced an efficient data model and user interface to work on mobile and web devices.
- Coded the presentation and service layers for the 6 major features.

Product Manager   October 2020 - February 2022

Encompass Technologies

Portland, OR

Launched a beverage manufacturing web app by coordinating with product, engineering, sales, services, and external customers.
- Defined the data requirements and the user experience for a team of 5 developers to build.
- Worked with 6 alpha and 3 current customers to maintain a product road map and release the new product in 12 months.
- Addressed customer pain points with the CEO and VP of Tech to refine and execute strategy.
- Communicated customer facing release notes bi-weekly.
- Led sales and internal services in adopting the new product.

Advisory Consultant   October 2016 - September 2020

Orchestra Software

Portland, OR

Managed 30 cross-functional projects centered around SAP B1 for medium sized breweries, distilleries and other craft beverage manufacturers.
- Automated business processes with software integrations including a WMS system, a data warehouse, and an EDI solution.
- Managed the successful implementation of 12 customers including data migration, training, and support.
- Awarded the Core Value Award for Excellence in Teamwork in 2017.

Application Developer   July 2014 - September 2016

RSM US LLP

Pleasanton, CA

Developed classes, data tables, methods, and forms in Microsoft Dynamics AX.
- Released 3 feature applications including a sales prorating workbench and an inventory management dashboard to increase user efficiency.
- Wrote and tested 50 reports with SQL and SSRS to analyze inventory, operations, and financials.
- Participated in regular code reviews.
